

WiNODE™

Applications

- Intelligent Completion system for Real-Time Data and Control
- Optimized Production
- Modular and Flexible System
- No in Well umbilicals

Features

- Full bore Side Pocket Mandrels installed in lower completion production interval
- Monitor Reservoir Pressure, Temperature, Flow Rate and Water Cut
- Variable orifice Inflow Control Valve for each production interval, over 100 position choices
- Wireless Communication to surface and Self-sustained Power Generation
- WiNODEs deployed and retrieved with standard kick-over tool on WL
